NICK KOUKIS

SOFTWARE ENGINEER

PROFILE

Software Engineer with over 5 years of full-stack development experience, specializing in web solutions and API creation. Proficient in PHP, JavaScript, Node.js, React, Next.js, and Laravel, with a focus on building scalable, high-performance applications. Currently leading innovative workflows at tgndata, utilizing Puppeteer and Playwright for advanced web scraping solutions. As a freelance contractor with SOFTWeb, I deliver custom solutions, integrate third-party APIs, and develop comprehensive unit tests to ensure robust application performance. Passionate about leveraging modern frameworks and technologies to drive impactful results.

WORK EXPERIENCE

- **Software Engineer & Workflow Team Leader** 2022 - PRESENT
tgndata, Athens
 - Led a team of 5 developers.
 - Scraping tools using Puppeteer and Playwright technologies.
 - Developed and optimized web scraping tools to enhance data collection processes.
 - Maintained high-traffic applications on Linux (CentOS/Rocky) platforms.
- **Freelance Contract Full-Stack Engineer** 2024 - Present
SOFTWeb, Thessaloniki
 - Built responsive web applications using Angular, integrating third-party APIs.
 - Delivered custom solutions for multiple clients with consistent positive feedback.
 - Creation of Unit Tests
- **Full-Stack Developer** 2020 - 2022
3CP, Patras
 - Developed custom WordPress/WooCommerce plugins and themes for enhanced site functionality.
 - Ensured WCAG compliance for multiple websites using WAVE Web Accessibility tools.
- **Junior Web Developer** 2018
Data City Services, Patras
 - Built websites using Web2py and Python, integrating MySQL databases for dynamic content.
 - Gained hands-on experience with Linux (Ubuntu) for server management.
